1. Executive Summary

ClubOps is a comprehensive SaaS platform designed specifically for gentlemen's club management. The application provides a premium, dark-themed interface optimized for low-light environments with real-time operations tracking across all key business functions.

Design Principles

- Dark theme with vibrant gold, blue, and red accents
- Optimized for low-light club environments
- Real-time data synchronization across all modules
- Drag-and-drop interfaces for intuitive operation

2. Dashboard Overview

The main dashboard provides at-a-glance visibility into all club operations with real-time metrics, activity feeds, and quick action buttons.

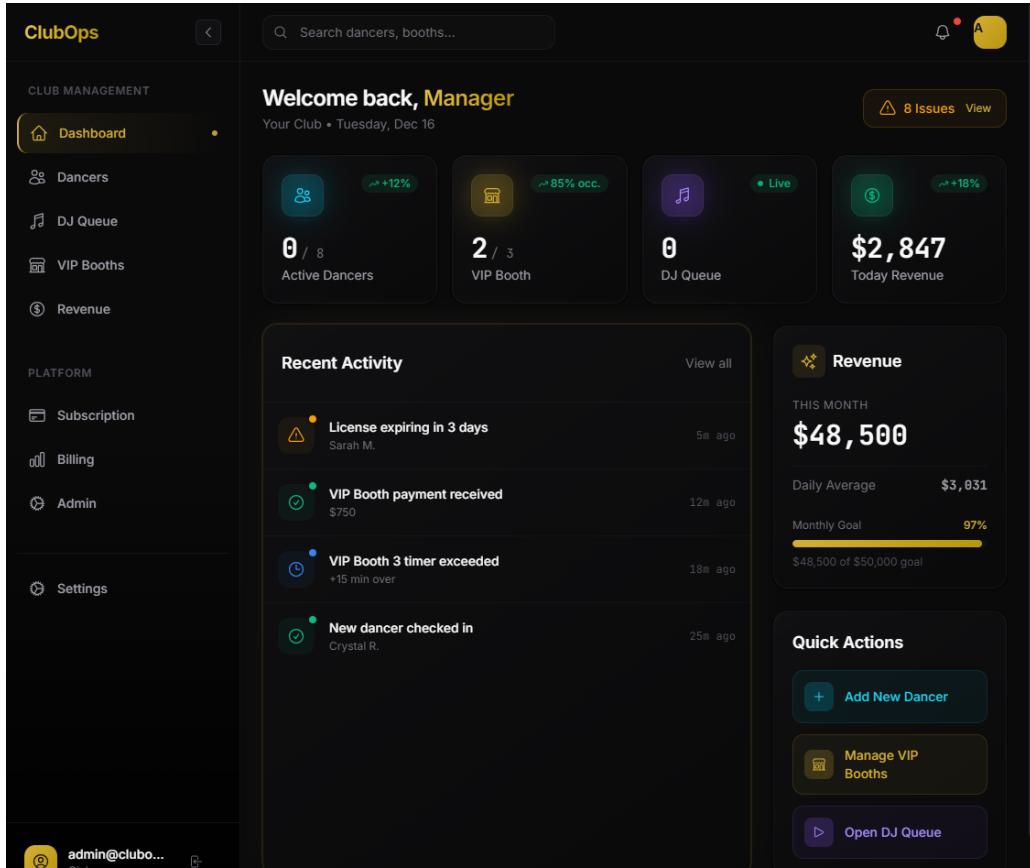

Figure 2.1: Main Dashboard with real-time metrics and activity feed

Key Components

- Active Dancers Counter
- VIP Booth Status with occupancy
- DJ Queue Status
- Today's Revenue with growth %
- Recent Activity Feed
- Quick Actions Panel

3. Dancer Management

Comprehensive dancer roster management with license compliance tracking, bar fee collection, and performance status monitoring.

The screenshot shows the 'Dancer Management' section of the ClubOps software. On the left, a sidebar menu includes 'Dashboard', 'Dancers' (selected), 'DJ Queue', 'VIP Booths', 'Revenue', 'Subscription', 'Billing', 'Admin', and 'Settings'. The main area is titled 'Dancer Management' with the subtitle 'Manage profiles, compliance, and check-in status'. It features a search bar at the top right and a 'Add Dancer' button. Below is another search bar and a dropdown for 'All Status'. The main content area displays a grid of dancer profiles:

Dancer Name	Status	Bar Fee	Contract	Action Buttons
Crystal (Sarah Johnson)	active	All documents valid	Bar Fee: X Unpaid Contract: O Pending	View
Diamond (Jessica Smith)	active	All documents valid	Bar Fee: X Unpaid Contract: O Pending	View
Ruby (Maria Garcia)	active	Expires in -336 days	Bar Fee: X Unpaid Contract: O Pending	View Fix Issues
Sapphire (Amanda Lee)	active	All documents valid	Bar Fee: X Unpaid Contract: O Pending	View
Emerald (Nicole Brown)	active			
Pearl (Emily White)	inactive

4. DJ Queue System

The DJ Queue features drag-and-drop stage management, an integrated music player supporting MP3, AAC, FLAC, and WAV formats.

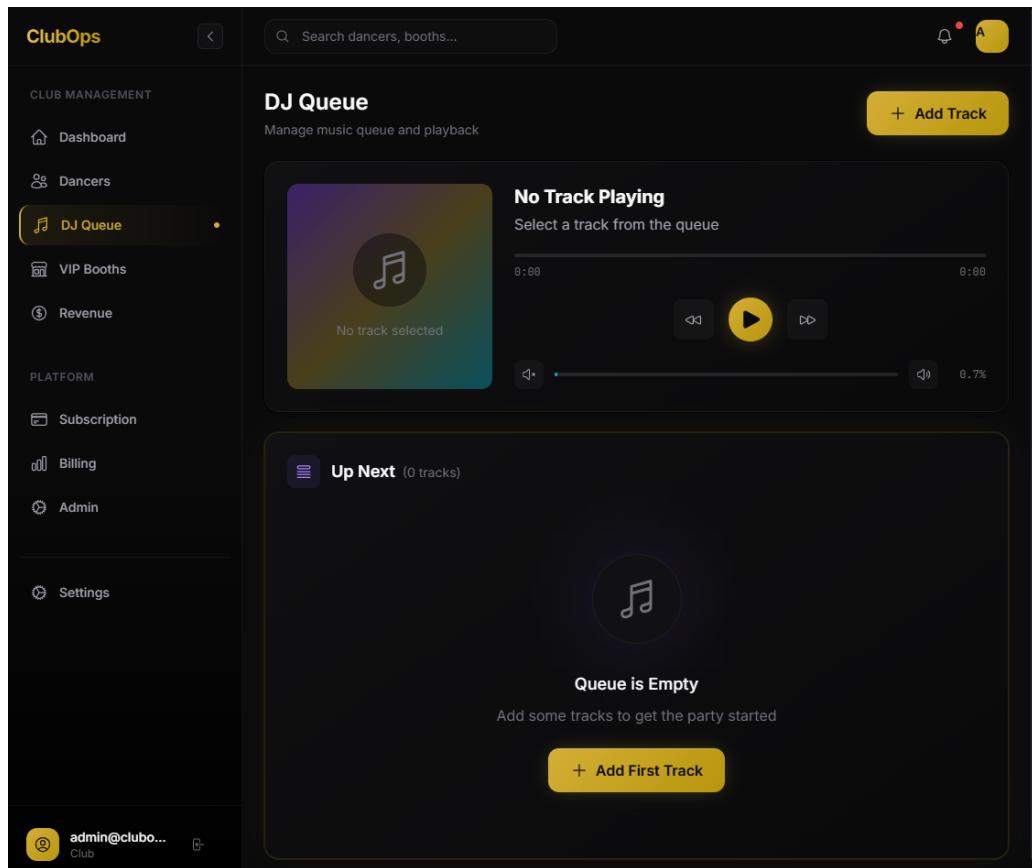

Figure 4.1: DJ Queue interface with integrated music player

5. VIP Booth Management

Real-time VIP booth monitoring with session timers, occupancy tracking, and revenue calculation.

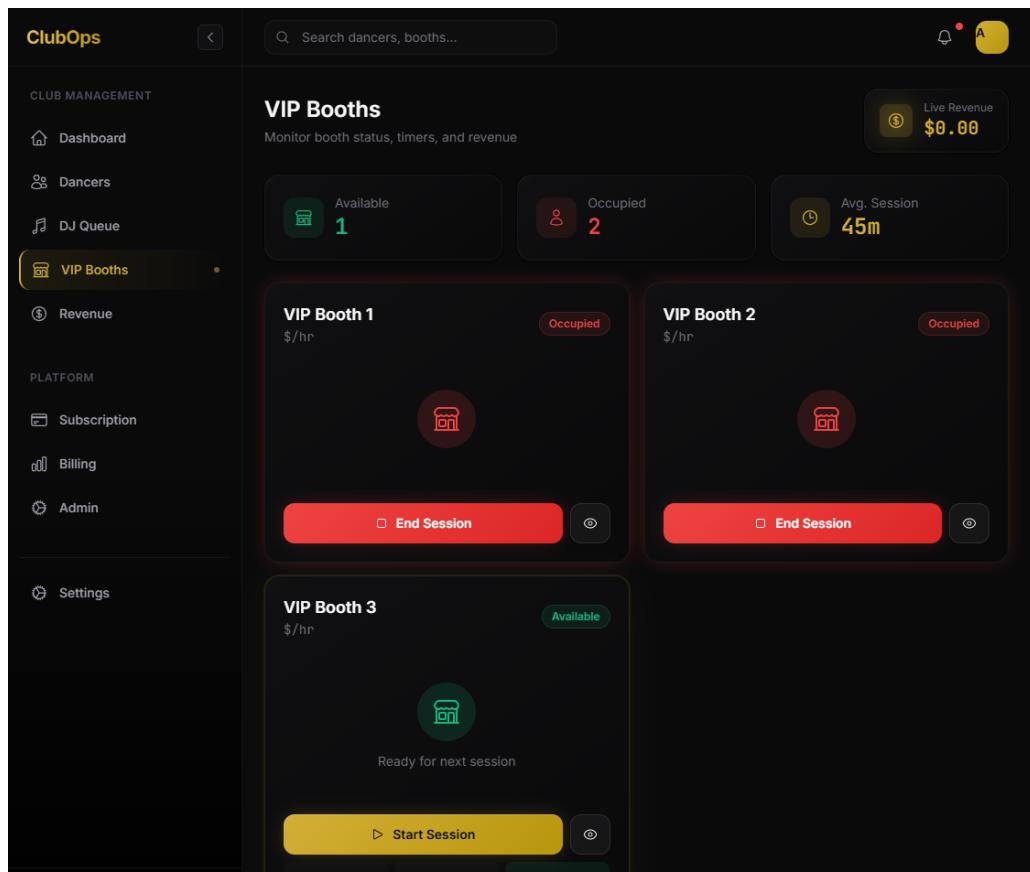

Figure 5.1: VIP Booth status cards with session controls

6. Revenue Dashboard

Comprehensive financial tracking with multi-period views, revenue breakdown by category, and goal tracking with progress visualization.

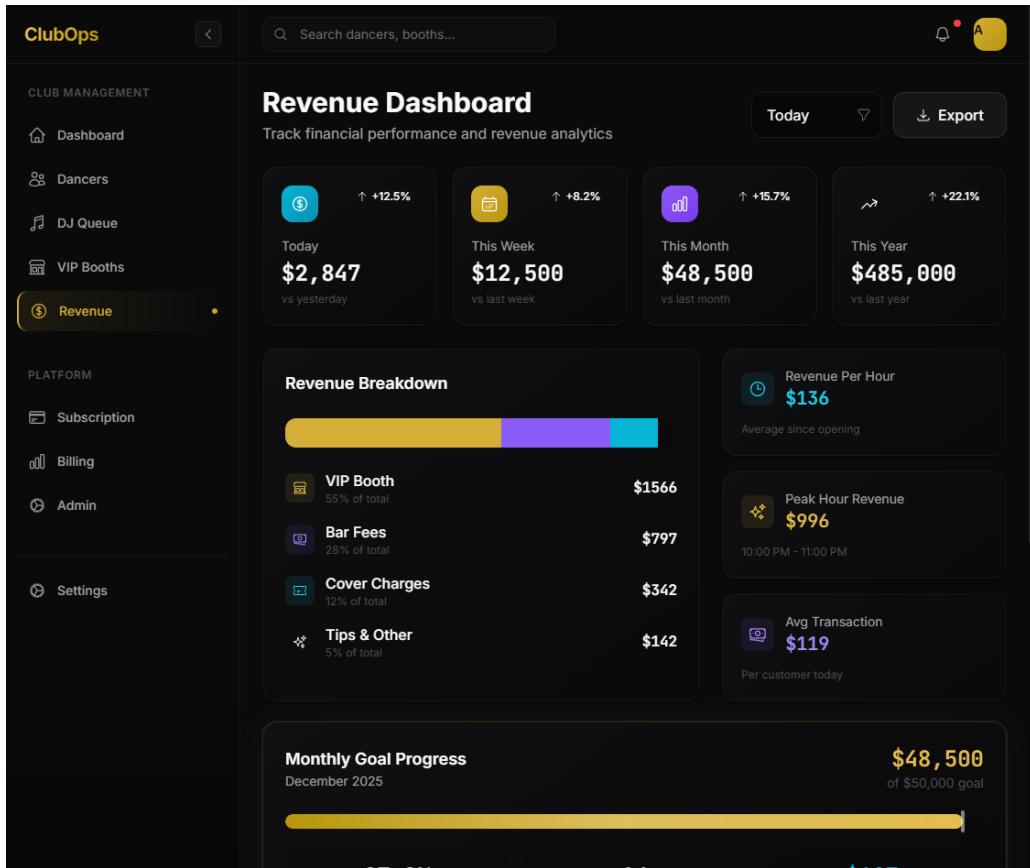

Figure 6.1: Revenue Dashboard with breakdown and goal progress

7. Settings & Configuration

Centralized settings for user profiles, club information, notifications, security, and integrations.

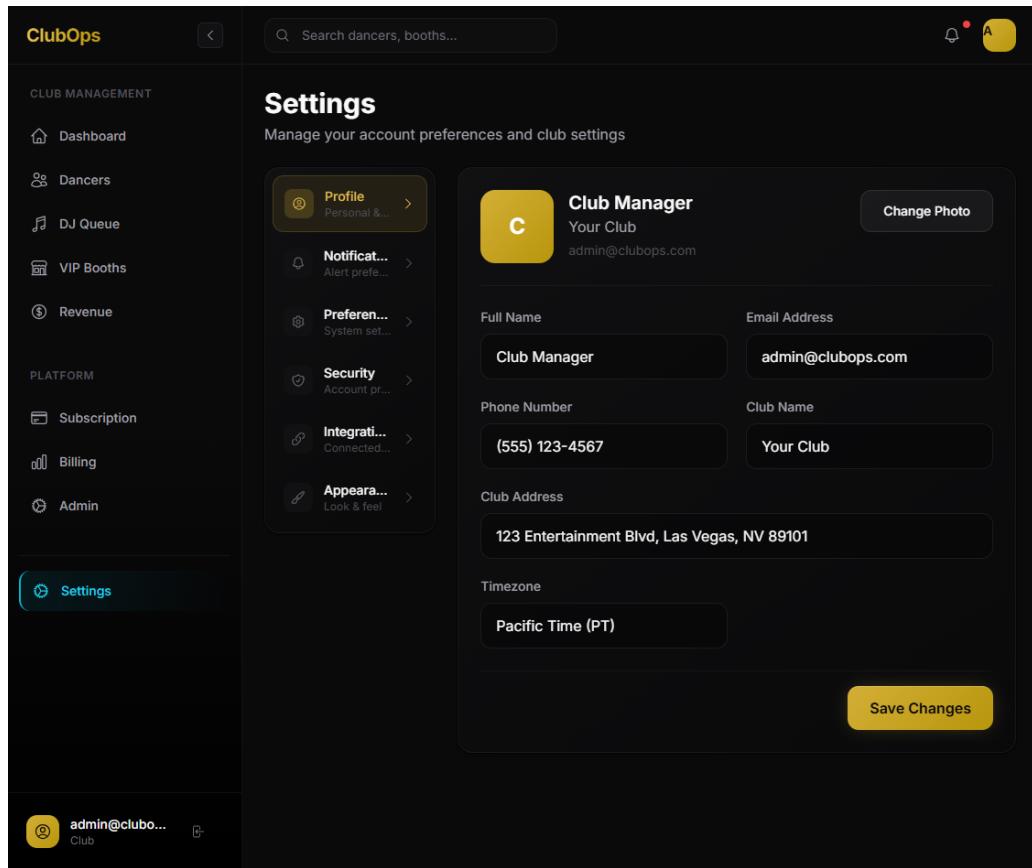

Figure 7.1: Settings page with profile configuration

8. Investor Landing Page

A dedicated public landing page featuring market opportunity (\$8.1B), product roadmap, revenue model overview, and live demo access.

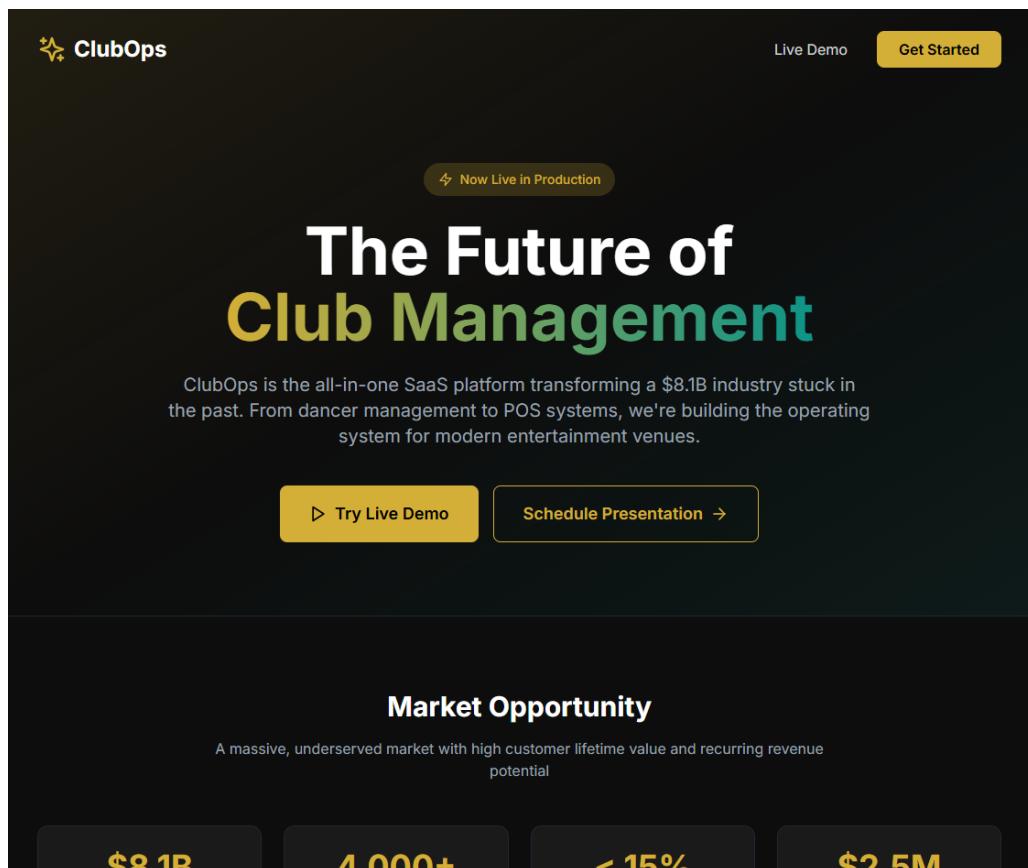

Figure 8.1: Investor landing page hero section

9. Technical Stack

Frontend

- React 18 with TypeScript
- Vite for fast builds
- Tailwind CSS
- Lucide React icons

Backend

- Node.js with Express.js
- PostgreSQL with Prisma ORM
- JWT authentication
- Socket.io for real-time

10. Subscription Tiers

Tier	Price	Features
Free	\$0/mo	Basic dashboard, up to 10 dancers
Basic	\$99/mo	Full dashboard, unlimited dancers
Pro	\$199/mo	All features, API access, analytics
Enterprise	\$399/mo	Multi-location, white-label, SLA
